"Dinner parties, space for family and friends, a house with a curiosity, quality furnishings that dress the house and its history, you get the feeling of entering a manorial environment. This incredible whole is also suitable for business activities for parties, bed and breakfast or similar functions. A whole with that little extra"

Built in the 1850s, this handsome two-story log house gives off a manor house feel with its white columns at the entrance and gently ornate windows. Everything indoors is stylish and of high quality, the interior is well thought out with real wooden floors, wooden ceilings, the color scale used, antique lamps with their warm lighting, beautiful wallpapers, specially ordered from Stockholm's tapetapotek, you can even in one of the rooms find exactly the same wallpaper as Carl von Linné had in his summer house in Hammarby.

The whole of this house is very beautiful and has a coherent theme that you can feel when you walk around the different rooms with high-class furnishings.

A lilac hedge gives the courtyard a peaceful atmosphere and the large and spacious manor building has a size of approx. 185 m² and 7 rooms. In this house you have 3 large bedrooms upstairs with well maintained fireplaces and spacious closets in each room. From the upstairs hall, you can go out onto a large balcony and sit in the morning sun and look down over the courtyard. In the garden, you will find easy-care perennials and lawn.

The main entrance has a high ceiling and there is a small working stove that effectively heats both the staircase and the upper hall. From the main entrance you come directly to the kitchen and dining room or to the large party hall.

The kitchen is large and bright with plenty of room for a larger family or group. In the kitchen there is a working wood-burning stove, oven and also ceramic electric stove, fridge and freezer. The kitchen has its own entrance with its own small entrance hall. From the kitchen there is a staircase down to the medium-sized basement which has standing height.

From the kitchen there is a staircase to one of the bedrooms as well as a small "auxiliary kitchen" towards the dining room for taking out food or receiving dishes. Next to the kitchen there is also a bathroom/WC.

In the large party hall there is a beautiful, large tiled stove which has been in active use for heating but also to set the mood in the large hall for game nights, mingling and evening sittings with guests, friends and business meetings. The ceiling chandelier, which also works with candles, provides a beautiful warm light in the room.

The room invites you to pour a glass, sit in front of the fireplace in the glow of the candles and dream of another time period. You can easily imagine dinner parties, game nights and conversations held in this room.

In addition to the large party hall, there is a dining room that has a large table for 12 people. Also in this room is a beautiful, smaller tiled stove with golden details.

In this house you always have the opportunity to take a quiet moment, in the library you can relax, listen to the crackling of the tiled stove and read your favorite book.
